EDUCATION

Nov 2023-July 2024 **McCombs School of Business, The University of Texas at Austin**
Post Graduate Program in Artificial Intelligence and Machine Learning: Business Applications

Modules:

- Python Foundations
- Machine Learning
- Advanced Machine Learning
- Introduction to Neural Networks
- Introduction to Computer Vision
- Introduction to Natural Language Processing

Aug 2011-July 2012 **Institute of Systems Science, National University Singapore**
Graduate Diploma in Systems Analysis

Modules:

- Methodology (ADLC)
- Technology (Distributed Computing Infrastructure)
- Databases (Databases, SQL Programming)
- Programming: C# Suite(Fundamentals of Programming using C#, Object Oriented Programming using C#, User Interface Development with Visual Studio.NET and C#, Developing Enterprise Systems with .NET Framework)
- Programming: Java Suite(Java Programming, Advanced Java, Building Enterprise Application using J2EE)
- Internet Application Development (Multimedia And Internet Technology, Internet Programming With Microsoft .NET Framework)
- Project Management (Roles and Responsibilities, Project Planning and Control, Change Management and Control, Business Communication)
- Mobile Solution (Mobile Application Development with Android Platform)

Dec 2002- Sep 2005 **University of Dagon**
Bachelor of Arts (English)

Sep 2004- Jan 2006 **University of Yangon**
Diploma in Information and Communication Technology

Jan 2003- Feb 2004 **University of Yangon**
Diploma in Electronics

PROFESSIONAL EXPERIENCE

Feb 2008- May 2010 **Global Wave Technology Co. Ltd.**

Global Wave Technology was founded in the year 2004 and has grown from modest beginnings to become a leader in the fields of software development.

As a Web Application Developer at this company, I

- Participated in developing and implementation of a customized CRM system in an open source environment within a tight timeline.
- Picked new technology up quickly.
- Organized and managed all the processes of system development life cycle.
- Cooperated and shared idea and knowledge with coworkers.

As a Windows Application Developer at this company, I

- Participated in developing and implementation of a customized market analysis system.
- Supported and provided services for payroll and time attendance system, stock management system and point of sale management system for company's clients.
- Maintained the above systems and completed change requests from users.

Feb 2012-July 2012 **Pulsesync Pte. Ltd.**

As an internship student at this company, I

- Participated in developing AIC InterRAI Assessment, Service Matching & Care Coordinator System within a tight timeline.
- Picked new technology up quickly.
- Gave a lot of supports to the supervisor with helpful suggestion and performance.
- Performed Unit/Module testing, Integration testing, System testing, User Acceptance Testing and Deploying testing.
- Participated in developing Health Care Systems (IngoT) using Microsoft Dynamics CRM 4.0.
- Worked on CRM customization and configuration such as
 - Managing Users & Teams and Security

- Customizing Attributes and Entities
- Customizing Relationships and Mappings
- Managing Forms, Views, and Charts
- Creating and generating reports using SQL Server Reporting services.

Jan 2013-Aug 2014 **Analyst Programmer at RCL Feeder Pte. Ltd.**

As an Analyst Programmer and Team Lead at this company, I

- Participated in developing crucial projects in J2EE with SDLC for the company.
- Designed and created business financial reports as user requested.
- Supported existing systems for users (Bug Fixing, Ad hoc reports, etc.)
- Made improvements to the current systems to reduce manual work and to deliver timely reports to users.

Dec 2014- Nov 2022 **Senior Application Consultant at NCS Pte. Ltd.**

As an application consultant at this company, I

- Participated in requirement gathering, designing and developing crucial Geolocation and Geoprocessing based projects using C#.NET, MS SQL, Javascript, JQuery, Angular JS, NODE JS, J2EE, Oracle SQL, ESRI ArcGIS tools with SDLC for the client.
- Designed and created AD-HOC reports using Crystal Report, Microsoft RDLC Report as user requested.
- Supported existing systems for users (Service Requests (SR/CR), Enhancements, Bug Fixing, Ad-hoc reports, etc.)

Nov 2022-Nov 2023 **Senior Application Consultant at NEC Asia Pacific Pte Ltd**

As an application consultant at this company, I

- Participated in requirement gathering, designing and developing crucial project using C#.NET, MS SQL, Javascript with SDLC for the client.
- Designed and created AD-HOC reports using Microsoft RDLC Report as user requested.
- Supported existing system for users (Service Requests (SR/CR), Enhancements, Bug Fixing, Ad-hoc reports, etc.)

TECHNICAL SKILLS

- Microsoft Technologies: Visual Studio 2019, .Net Architecture, DotNet Framework 4.8, C#.NET, WCF, ASP.NET MVC, Ajax Telerik RadTools, Microsoft D365, Xrm tools, Microsoft SSRS.
- JAVA Technologies: J2SE, J2EE Application Development, Java Servlet, Java Beans, JSP, JDBC, Struts, Spring Framework, Hibernate, Oracle WebLogic, IBM WebSphere.
- ArcGIS Javascript APIs, ESRI ArcGIS server and desktop technologies

- Zend: Zend Framework for PHP web development
- Eclipse: Eclipse IDE
- Oracle: Oracle JDeveloper, Oracle SQL Developer
- Apache: Apache Tomcat
- Database: MySQL/MS SQL 2017, Oracle PL/SQL Development, SQL Anywhere
- AWS: Cloud hosting, serverless computing
- Reporting: Crystal Reports, Oracle Report Builder
- Others: HTML, Javascript, JQuery, Angular JS v1.5, Angular v2.x, NODE JS, Python, etc.

Common SKILLS

- Problem Solving
- Carefully analyzed the bugs and problems in the current systems and implemented better systems for clients.
- Oral Presentation
- Conduct a presentation for the new modules added to the current systems.
- Handles Conflicts
- Follow up with customer's complaints and work with various departments for a resolution to ensure customers' satisfaction.

Systems SKILLS

- Systems Analysis
- Determined how can the current system be improved and how changes in conditions, operations, and the environment will affect outcomes.
- Systems Evaluation
- Identified measures or indicators of current system performance and the actions needed to improve or correct performance, relatives to the goals of the system.

PROFESSIONAL DEVELOPMENT & CERTIFICATION

2009 Microsoft Dotnet Framework – Application Development Foundation

2010 Certificate of Completion Web Essentials Course

2015 Completed training on NCS Standard .Net Development Tools

2017 Completed training on Extreme Programming (XP) 1 - Test Automation, CI (.Net)

2018 Completed NCS iConnect Java Training.

PROFESSIONAL WORK EXPERIENCE DETAILS

- **Global Time Attendance**

From February 2008 to September 2009

Global time Attendance is a Window-based time attendance application which is designed to collect employees TIME IN/OUT from Fingerprint Time Recorder or USB Fingerprint Scanner. And it calculates the useful information like Late, Shift, Leave, OT, Absence, etc...

Skill Sets used – Microsoft DotNet 2.0 (VB.Net) and MS SQL 2005

Team members 4

Duration: 4 weeks

- **Online Restaurant Reservation (GMS Singapore)**

From October 2009 to May 2010

The web-based restaurant management system which is required by GMS to manage the reservation of restaurants in various clients and gather information for further marketing strategies.

Skill Sets used – PHP and MySQL

Team members 3

Duration: 2 weeks

- **AIC InterRAI Assessment, Service Matching & Care Coordinator System (Care Coordinator System - CCIT) (PULSESYNC Singapore)**

From March 2012 to May 2012

Care Coordinator System Project aims to provide users with an integrated Care Coordinator System ("CCIT") means to:

- Assess patients (in particularly elderly and frail patients) using interRAI instrument in acute hospital setting which will then allow Care Coordinators to provide directed and holistic care to patients;
- Allow Care Coordinators to manage post-discharge follow-up after the patient is discharged from Hospital (and prior to admission to step down care facility, if any);

Skill Sets used – Microsoft DotNet 4.0 (C#.Net), ASP.NET Ajax Telerik RadTools, WCF and MS SQL 2008

Team members 2

Duration: 3 weeks

- **PSIngoT Cloud Project (PULSESYNC Singapore)**

IngoT Cloud System for Nursing Home

From June 2012 to July 2012

IngoT will also assist in other projects for other intermediate and long term (ILTC) healthcare providers such as hospice, nursing home, home medical agency, geriatric outpatient clinics. These systems will be built atop Microsoft Dynamics CRM 4.0/CRM 2011 and leverage on various MS technologies.

Skill Sets used – Microsoft Dynamics CRM 4.0/CRM 2011, Microsoft DotNet 4.0 (C#.Net) and MS SQL 2008 Reporting Services

Team members 2

Duration: 4 weeks

- **Budget System**

April 2013 to August 2014

Members: 9

Description

To overhaul a current budget system.

Skill Sets used – JAVA / J2EE, Weblogic, Oracle DB

- **eMargin System**

January 2013 to August 2014

Members: 2

Description

To provide Operating margin is used for marketing decision and the financial margin is to indicate profit and loss of the business in financial aspects.

- **Business Modules to work within Company's ERP system**

- **EMS Hard Error Handling**

Skill Sets used – JAVA / J2EE, Weblogic, Oracle DB

- **Vessel Utilization Report**

Skill Sets used – JAVA / J2EE, Weblogic, Oracle DB

- **General Billing System**

January 2014 to August 2014

Members: 2

Description

To provide billable items to the accounting department for business use.

- **Scored Card System**

April 2014 to August 2014

Members: 3

Description

To provide overall and details performance of every sector in the company.

Skill Sets used – JAVA / J2EE, Weblogic, Oracle DB

- **Electronic Handheld Terminal System IV**

December 2014 to April 2015

Members: 8

Description

The New Electronic Handheld Terminal System (EHT IV) will allow the HDB and HDB's appointed Service Providers (SPs and EPS) to carry out enforcement work in the HDB Car Parks and Service Road via 3G mobile technologies.

Skill Sets used – Microsoft DotNet 4.5 (C#.Net), ASP.NET Ajax Telerik RadTools, WCF, and SQL Anywhere.

- **Integrated MApping for Planning of Schools (i-MAPS), a Geographic Information System (GIS)**

April 2015 to September 2015

Members:4

Description

This system will provide an effective school infrastructural planning and development planning, an improved operational planning capability and efficiency as well as facilitate sharing of planning information with other division or branches for Development Planning Branch under MOE, Singapore.

Skill Sets used – Microsoft DotNet 4.5 (C#.Net), ASP.NET Ajax Telerik RadTools, ESRI ArcGIS server and desktop technologies and MS SQL 2012

- **Local Area Forecast System (LAF)**

September 2015 to April 2021

Members:3

Description

The LAF application is a desktop application designed to help Forecasters generate and evaluate the following 8 weather forecast charts:

- a. Local Forecast Chart;
- b. Graphical Forecast Chart (known as Section 1);
- c. Regional Forecast (Time Series) Charts for 6 Regions (known as Sections 2 to 6 and Brunei);

In addition, Forecasters will be able to generate the following charts:

- a. Regional Maritime Chart;
- b. Navy Chart (Local Waters);
- c. Other Navy Charts;

Note: Completed latest service request to export and send Local Forecast, Graphical Forecast and Regional Forecast charts as JSON files to designated remote servers.

Skill Sets used – Microsoft DotNet 4.8 (C#.Net) and MS SQL 2017

- **Map Data Management module for Next Generation Electronic Road Pricing System (ERP2)**

March 2017 to June 2018

Members:3

Description

Map data management module for Next Generation Electronic Road Pricing System designed to provide the detailed information of Map data Management System design architecture of the Next Generation Electronic Road Pricing System (Next-Gen ERP). Skill Sets used – Microsoft ASP.Net 4.5 (C#.Net), WCF services, ArcGIS for web application and J2EE with AngularJS, Spring Framework, Oracle SQL Database.

- **Heavy Rain Fall Alert System**

June 2017 to February 2021

Members: 3

Description

NEA Heavy Rainfall Warning module is looking to provide high rainfall SMS warnings to members of the public. It also provided the management of subscribers, search and report features of the SMS sent.

Skill Sets used – J2EE with Angular TS, Spring Framework, MSSQL Database.

- **COVID-19 Management System (CMS) on Microsoft Dynamics 365**

August 2020 to August 2021

Member: 16

Description

CMS system facilitates MOH officers with Case Management (Create, Review, Enrich), Contact tracing and activity mapping and issuance of Quarantine order or patient under phone surveillance.

Skill Sets used – Microsoft D365 with ASP.Net 4.5 (C#.Net), WCF services, and MS SQL.

- **MOE SSOE Messaging Portal**

August 2021 to Jan 2022

Member: 10

Description

MOE SSOE Messaging system has two sub-system:

CES 2.0 which facilitates automated or on demand Mailbox Creation/Termination/School Transfer/Title Update service requests for MOE staffs and school users such as teachers.

ICON 2.0 which help students with ICON account Creation/Termination/School Transfer for accessing Google Workspace, Gmail, Google drive, etc.

Skill Sets used – Microsoft ASP.Net 4.5 (C#.Net) with Entity framework and MS SQL.

- **MOM FWLS (Foreign Worker Levy System)**

Jan 2022 to November 2022

Member: 20+

Description

MOM FWLS:

FWLS facilitates MOM officers with adjustment of worker Levy and compute levy amount for each employer and generate billing details.

Skill Sets used – J2EE, NODE JS with serverless Framework, Spring Framework, AWS RDS MSSQL Database, AWS cloud services.

- **NEA EEMS (ENVIRONMENTAL ENFORCEMENT MANAGEMENT SYSTEM 2)**

Nov 2022 to Nov 2023

Member: 5

Description

The Enforcement Management module deals with all Enforcement actions like Warning Letters, Notice of Composition, Notice to Attend Court, Summons and related processes like Case Tracking, Orders/Notices, Financial Penalty and Minimal Cases.

EEMS2 interfaces with multiple government agencies to perform internal or external operations like issuing Warrant, Court Order, Fines, etc.

Skill Sets used – Microsoft D365 with ASP.Net 4.6 (C#.Net), WCF services, and MS SQL.

ACADEMIC WORK EXPERIENCE DETAILS

- **Application Analysis, Design and Development Project**

Case Study Waiter-on-Wheels: Computerized Delivery Tracking

From 23rd Aug 2011 to 5th Sept 2011

I am the system analyst working for Sam Wells and am required to complete the following and submit a **requirement specification document**.

My specification should contain the following:

- Background information about the system to be build
- Overview of what is in the scope and what is out of scope
- System use case diagram
- Functional Requirement
 - High Level
 - Actor List and Actor description
 - Package/Sub-packages/use cases
 - Low Level
 - Activity diagram
 - Class diagram
 - Screen/Print out design
- Non-Functional Requirement
 - System Architectures
 - System Performance Requirements
 - Security Requirements
 - Reliability Requirements

Skill Sets used – the Object Oriented approach using Unified Modeling Language (UML) as a standard notation and is based on the Rational Unified Process (RUP), IBM Rational Rose.

Team members 8

Duration: 2 weeks

- **Internet Project with Multi Media, ASP.NET and Web Services**

Virtual Shopping Cart Application

From 3rd Nov 2011 to 21st Nov 2011

I am required to design and develop a virtual shopping cart application using the techniques (User-centered Design, Web Usability, Internet Programming and Multimedia). The objectives of this application are

- Effectively advertise the products over the Web.
- Easy order placement for the customers through direct order entry.
- Fast sales processing through on-line product ordering.

Skill Sets used – Microsoft ASP.NET 4.0 with C#, Web Services, MS SQL 2008, Adobe Photoshop CS5.1, and Adobe Flash Professional CS5.5.

Team members 8

Duration: 2 weeks and 3 days

- **Web application with J2EE**

Leave Application Processing System (LAPS)

From 5th Dec 2011 to 12th Dec 2011

I have been tasked by the Institute of Systems Science (ISS) to develop a '**Leave Application Processing System' (LAPS)**. Employees of ISS will be able to access this system from ISS intranet website.

The system must be implemented as a web-based Java EE application, using MySQL RDBMS to save all persistent data. My system must use JSP or Servlets for the Web layer, simple business functionality, and DAO for data storage and also the usage of Struts and Hibernate framework.

Skill Sets used – Java SE, Java EE with JSP and Servlet, MySQL, Eclipse.

Team members 8

Duration: 1 week

- **Application Development Project**

From 9th Jan 2012 to 7th Feb 2012

We will work in teams to deliver application software using Object-Oriented analysis and design (OOAD) of software development life cycle based on Rational Unified Process (RUP) using Unified Modeling Language (UML).

The main deliverable of this project is the Logic University (LU) Stationary Store Inventory System.

We shall develop project plans, analyze and design a solution, code and test, conduct user acceptance test and deliver documentation and codes with given time frame.

Skill Sets used – Visual C#, and DotNet 4.0. Visual Studio DotNet 2010, Crystal Reports DotNet, MS-SQL Server 2008.

Team members 8

Duration: 1 week
